Detailed Action

Election Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-35, 40, 41, 89-95, and 100-102, drawn to a generic method of providing a desired set of service policies to each of a plurality of subscribers, classified in class 709, subclass 220.
 - II. Claims 36-39, 42-50, and 76-88, drawn to a method of assigning an IP packet related to a subscriber in an internet service node, classified in class 370, subclass 395.1.
 - III. Claims 51-57 and 96-99, drawn to the hardware components of an internet service node, classified in class 709, subclass 250.
2. Inventions I, II, and III are related as combination (group I) and subcombination (groups II and III). Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it fails to specify the assignment of the communications protocol used, as in group II, as well as failing to specify any components of the internet service node, as in group III. The subcombination has separate utility such as the assignment of IP packets to one or more processors using a search field and mask, as well as the use of switch fabric to forward data, received from a port, to a subset of processors.

Art Unit: 2153

3. Because these inventions are distinct for the reasons given above and hence acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of the inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marlon Johnson whose telephone number is (703) 305-4642. The examiner can normally be reached on Monday to Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glen Burgess, can be reached on (703) 305-4792. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-3230.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
